The ribbon-cutting ceremony

Founded in 1980 in Munich, Germany, PULS GmbH is the only company devoted to DIN-rail switched-mode power supplies in the world. The company possesses logistic production bases in Germany, Czech, and Suzhou, and sales and service branches in Switzerland, Britain, America, and China, etc. With the past 30 years' development, PULS has become an international enterprise with 8 million power supply products providing powers for millions of automation machinery.

Ma Minglong, Executive Member of CPC Suzhou Municipal Committee and Secretary of SIP Party Working Committee, paints the eyes of a dancing lion

Located on Xingpu Road with 14,000-square-meter land area, PULS (Suzhou) has entrusted a famous European architect with the designing of its functional complex of offices, R&D, logistics and production. As the logistic production base of the Group in Asian-Pacific region, PULS (Suzhou) has brought in world-class power supply equipment with the value of over 10 million Euros in 5 years in order to keep a world-class position of productivity in the next 10 years.

PULS is located on Xingpu Road, SIP

More importantly, PULS (Suzhou) will build up its first power supply R&D center outside of Europe at the end of this year to keep pace with the transformation and upgrading of SIP, to further improve its level of products and services, and to make the company a competitive global center of the Group.
